

MACHINE SKATES

CM60

CM120

CM240

CM series | Skates, adjustable, 6-24 ton

The adjustable skates are two skate units which are connected by two steel rods, making the width of the skates adjustable. The skates can also be used as separate individuals.

RC15

RC15 | Roller crowbar, 1,5 ton

Long and steady manual roller lifter that lifts up the first millimetres above floor level to make it possible to then use a hydraulic lift jack. When the load is lifted up the skates can be positioned below.

ST30

ST60

ST120

ST series | Skates, steerable, 3-12 ton

The steerable skates include a 1 meter long drawbar and a skate platform that swivels on a thrust bearing, allowing easy movement around corners. On the ST60 and ST120 there is a towing hook-on bracket to be used by a forklift truck.

SF series | Skates, fixed, 1-6 ton

Skates can be used wherever heavy objects have to be moved. The large diameter nylon rollers ensure easy movement and spread the load evenly, protecting the floor or ground from damages caused by high point loads. A practical steel handle is welded onto the skate for easy and safe handling and positioning of the skates. The platforms of the skates are fitted with a rubber surface which helps grip and protect the object being moved. Powerful wheel pins. The wheels are mounted in rubber-sealed roller bearings (RS). In SF10 and SF20 there are no bearings mounted due small nylon wheels.

SF10

SF20

SF25

SF30

SF60

SC series | Skates, with castor, 1 ton

The castor skates are available in two models. SC 102 with 2 castor wheels and 2 fixed wheels for versatile turning of goods. SC 104 with 4 castor wheels for totally free turning of goods.

SC102

SC104
