

## PALLET TRUCK STAINLESS STEEL

Hand Pallet Truck produced in Stainless.

Stainless Hand Pallet Truck which is special produced for fisheries, slaughterhouse – and pharmaceutical industry.

Places where there are high demands on hygiene, environment and sanitation.

As the pallet truck is made of stainless steel, this means that it can withstand the majority of instances of the moisture and chemical cleaning.

For particularly aggressive environments, the pallet truck can be manufactured in acid resistant stainless steel.

# SPECIFICATIONS

The pallet truck is basically made of stainless steel.  
Pump cylinder made of bronze.  
Nut made of POM.  
Bolts, shafts, screws, and nuts and splits is also stainless.  
Load wheel assembly is easily replaceable

The pallet truck has a reliable closed hydraulic system with automatic free position valve. The polished pistons and cylinders provide long and reliable life. The automatic free position means that when the drawbar is moved slowly it does not lift the forks. When the drawbar moves quickly it lifts the forks normally.

## Options:

Parking brake

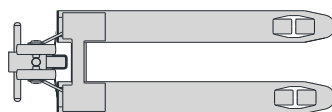

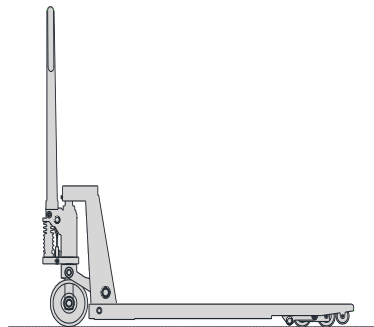

## Wheel

The steering wheel is rotated 110 ° to each side on all models.  
The steering wheels are mounted on a pivoting shaft which ensures that all three wheels are in proper contact with the ground.  
The load wheels are mounted for eases the journey across the pallets.
